

Karta „Różnorodność biologiczna na drzewie”

Załącznik zawiera dwie karty pracy zawierające sylwetki różnych organizmów czerpiących korzyści z drzew. Jeśli trudno wyjaśnić związek danego organizmu z drzewem, to można znaleźć potrzebne informacje na przykład w materiałach zawartych na stronie: https://beagle.miljolare.no/pdf/beagle_teachers_guide_pl.pdf (strona 42).
